

Important Piece of the Puzzle Activity

Directions: Distribute a puzzle piece to each child. Instruct the students to decorate it and to answer the questions on their piece. When the students are finished, glue the pieces together. Afterwards, ask the kids what would happen if a puzzle piece was missing. Listen to their responses and then emphasize that each student is like a piece of the puzzle, unique and important. Follow with dividing the students into pairs or groups of 4. Ask them to find similarities and differences among themselves just like the differences and similarities of their puzzle pieces. Reinforce how important it is to realize that each person, like each puzzle piece is needed and must be respected.

You are an important piece of the puzzle!

Fill in the puzzle piece so we can get to know you. Once you have it filled in with words, phrases, photos and/or drawings, cut it out neatly along the edges. Make sure you include your name somewhere on the puzzle.
